

Pitch Deck

Go digital with Boxity.

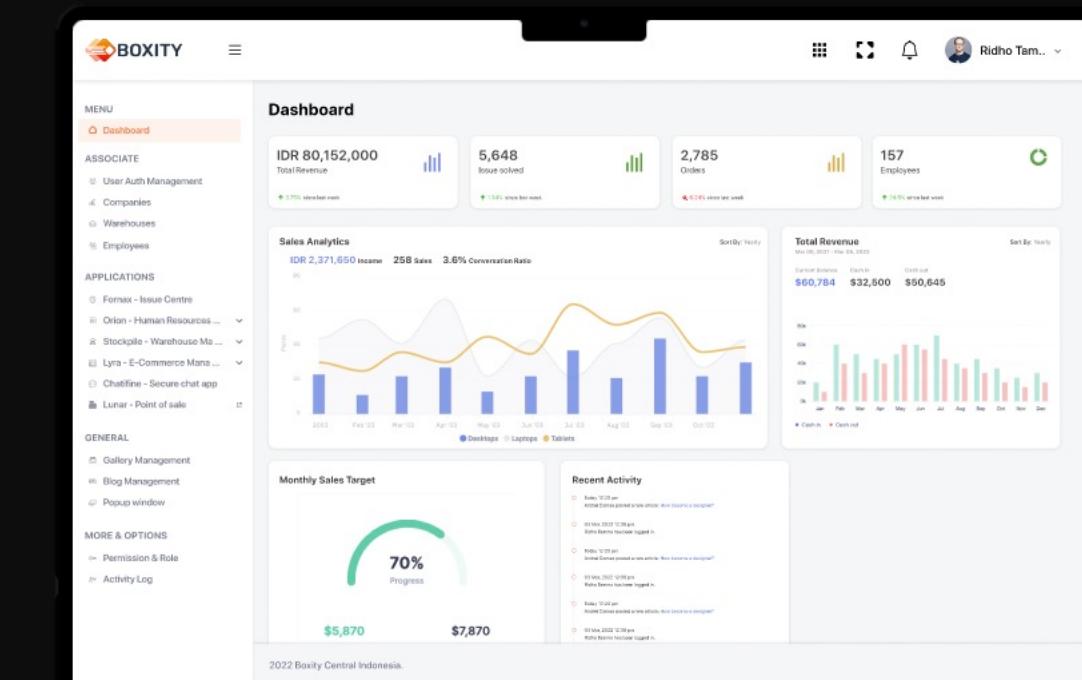

Home cover

Introduction

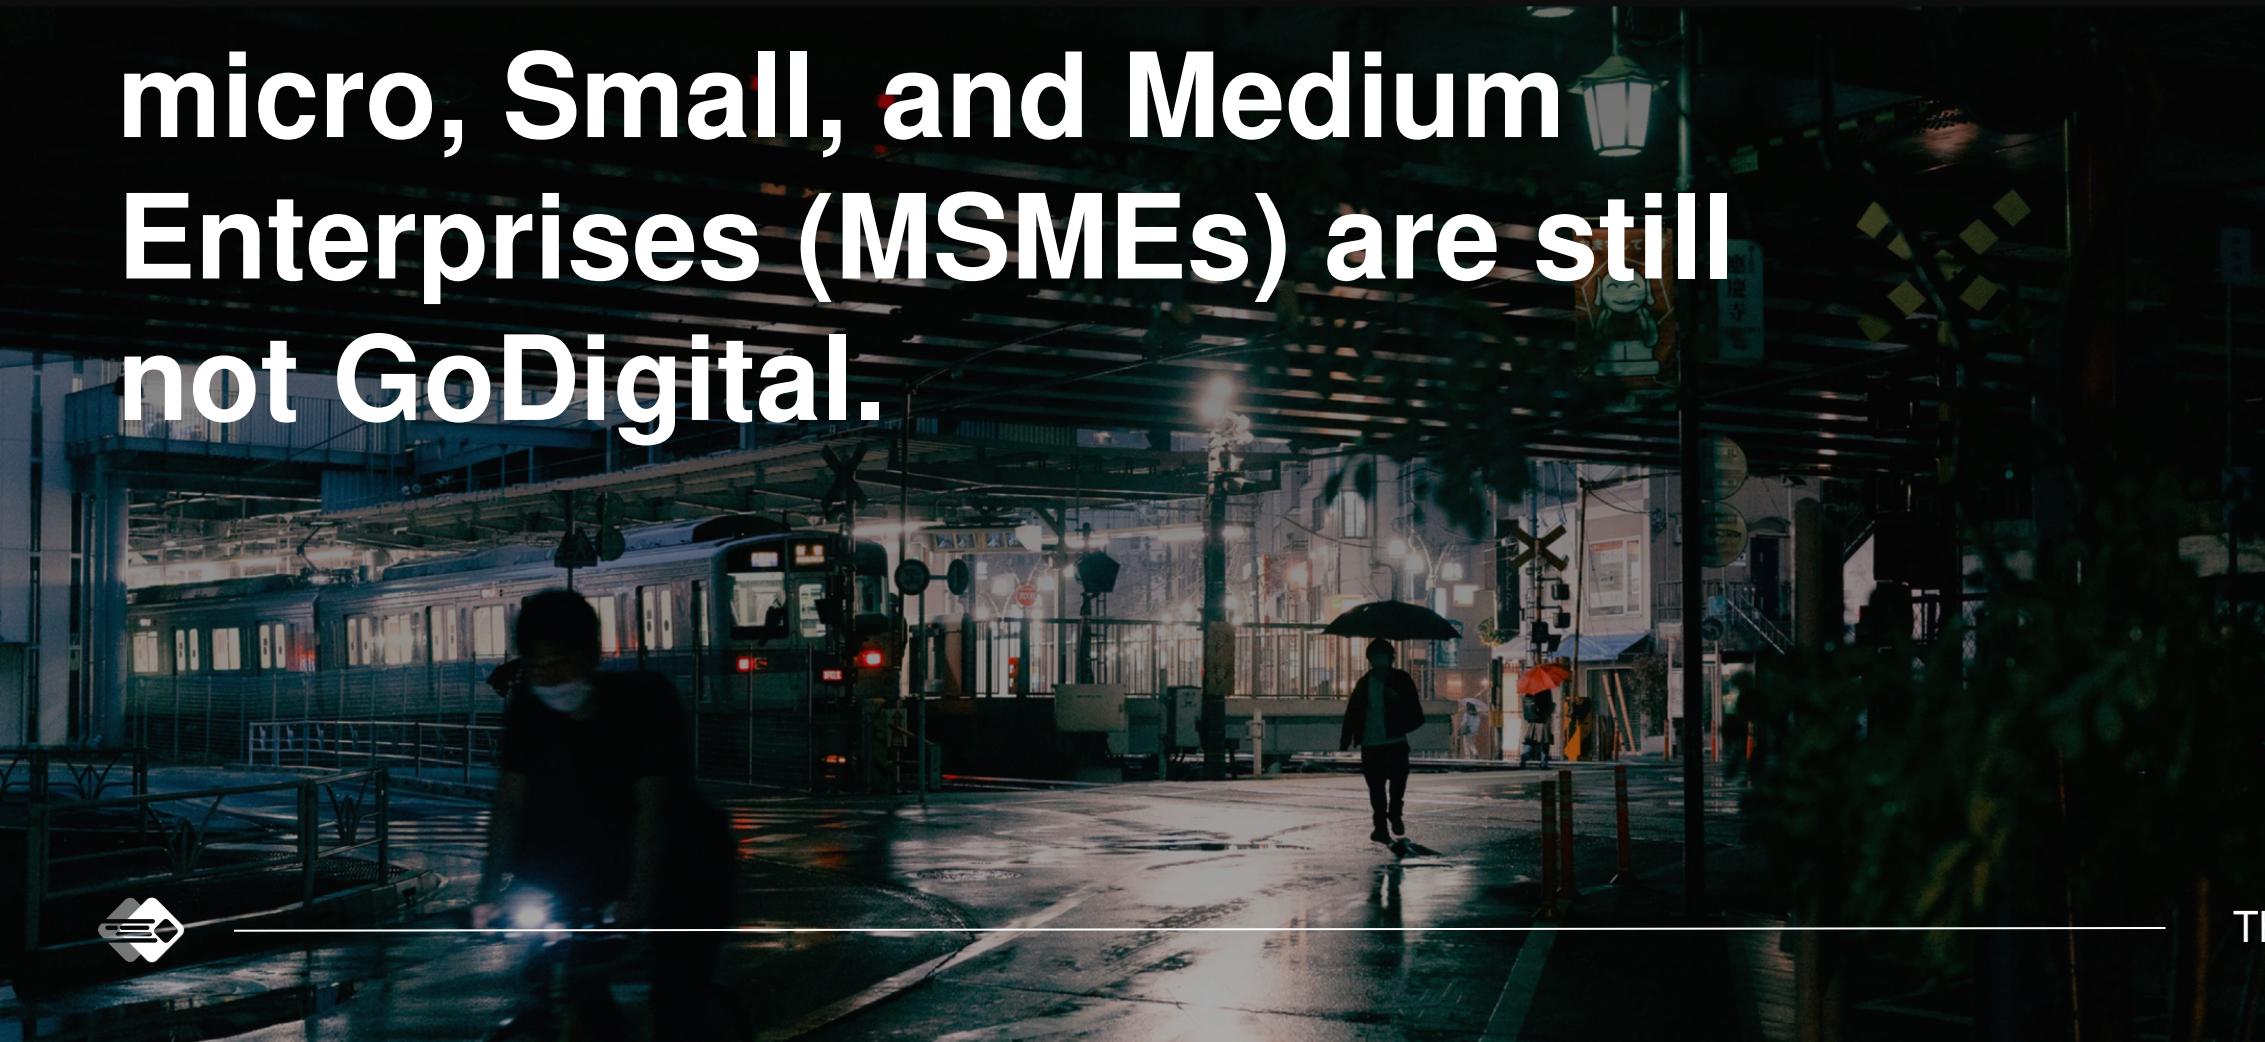

PT Boxity Central Indonesia was founded in 2022 to be part of Indonesia's go-digital movement and to be an important part of the contribution of MSMEs in Indonesia's economic development, with a full focus on developing ERP and SaaS applications with the latest mobile and web models. We build a system that integrates all the business processes needed by MSME clients to run their business from planning, purchasing, inventory, sales, marketing, finance, human resources, and others.

3 August 2022

Introduction

**More than 70% of Indonesia's
micro, Small, and Medium
Enterprises (MSMEs) are still
not GoDigital.**

THE PROBLEM

We've found a few troubles here.

This digitalization requires resources who have sufficient experience, and training that is carried out regularly so that using the digital software can be implemented and implemented. Late awareness / no desire to learn about "how can we be fast and effective?", difficult to develop digital marketing because of inappropriate prices, lack of support from the government, and competitive atmosphere from competitors who are still unable to support the readiness to use information technology for the market MSME

Chaotic Financial Reports

Messy warehouse management

Troublesome use of cashier

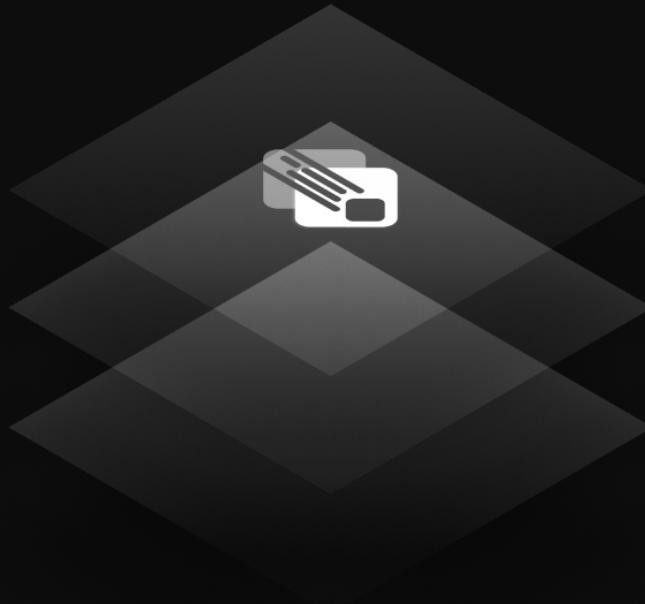

Pay employee salaries or complicated HR management

THE SOLUTIONS

About our Boxity's product

We build 1 large application that can be used for companies/medium businesses and can be used by small and micro businesses through application distribution via SaaS, and what we solve from these problems:

↑ COMPLEXITY

Designed to be user-friendly and used by both MSMEs and established companies.

↑ AGILITY

Constantly improving and evolving

↑ RESOURCES

You can hire additional resources if it's required, from us, it's no additional resources required.

↑ SECURITY

All security is handled by a global business with specialized 24/7 monitoring

↑ RISK

Less risk due to scale and specialization of the SaaS Help business

↑ ORION

The human resources & information system functioned to manage employee data, attendance, and administration with a cloud-based HR app

↑ STOCKPILE

The warehouse management system functioned to manage goods in your warehouse optimally, in real-time and can be accessed anywhere.

↑ LYRA

The E-Commerce management system functioned to manage online store data optimally and in real-time.

↑ LUNAR POS

Point of sales system, functioned to manage sell online, or sell offline easily and anywhere.

↑ FORNAX

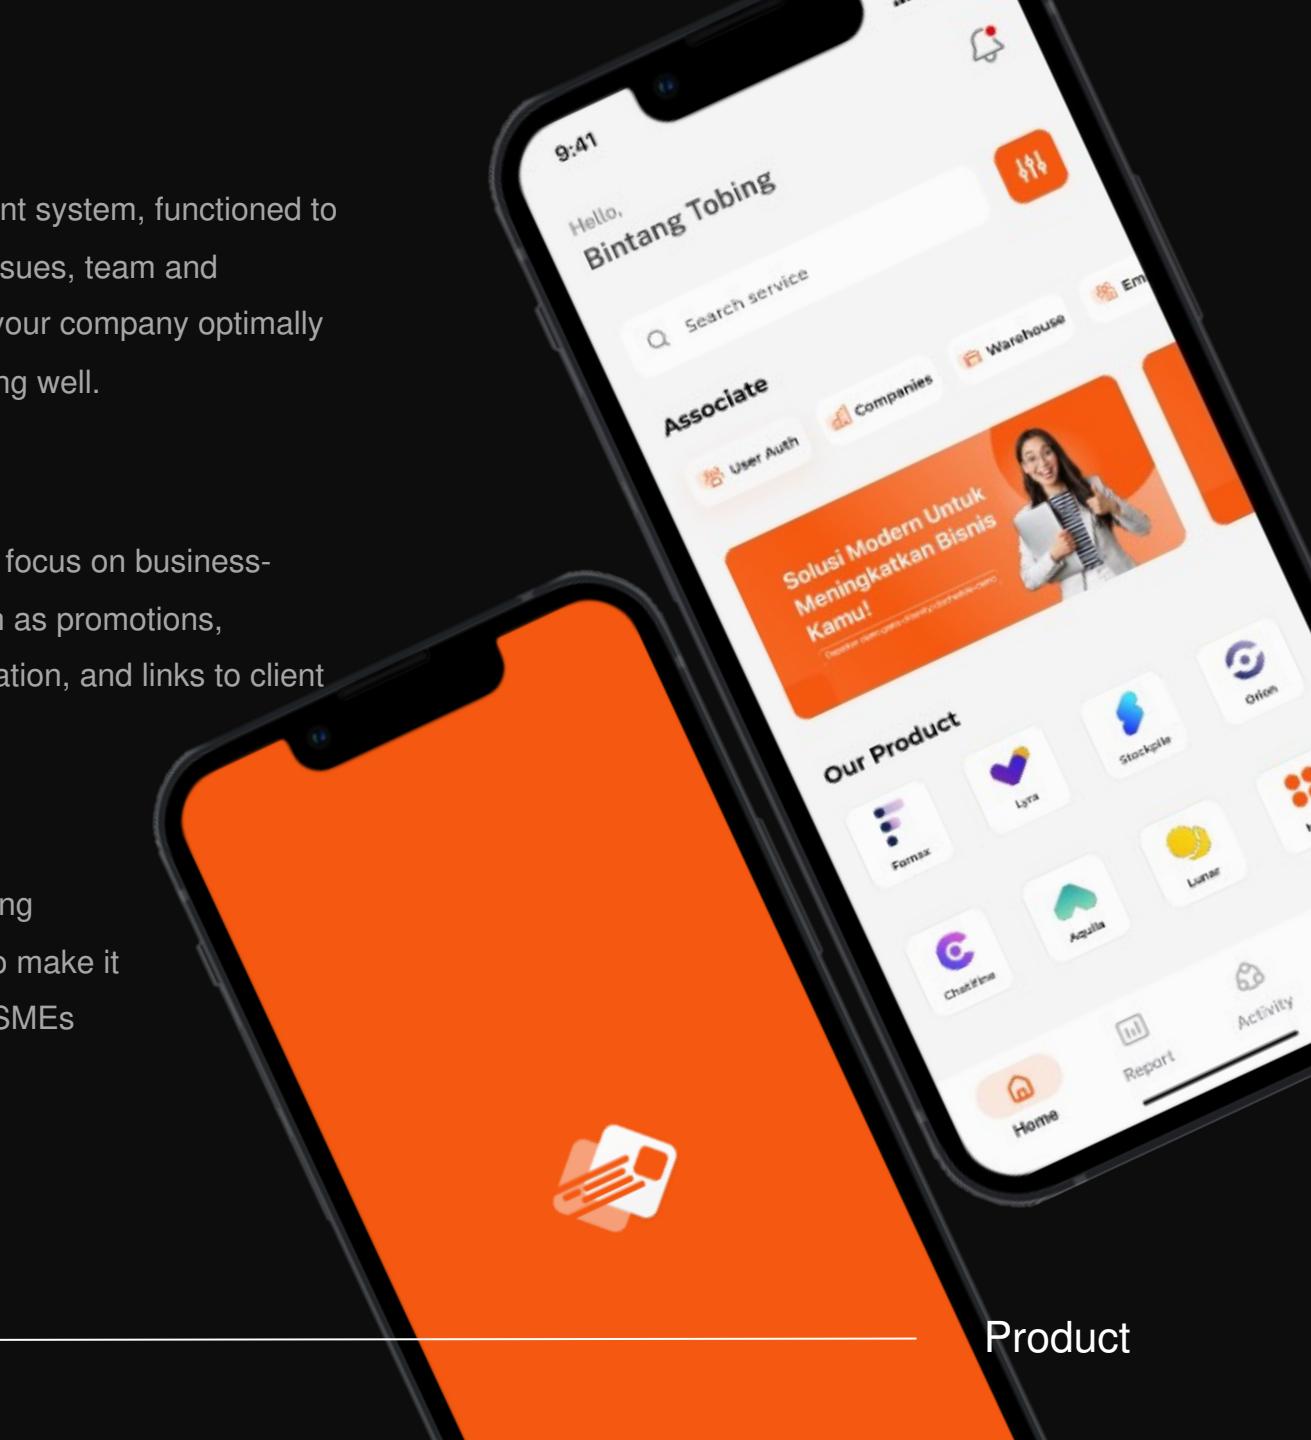

Issue center management system, functioned to manage management issues, team and everyone involved with your company optimally to keep your team running well.

↑ SEMPLICE

Micro-site that contain a focus on business-exclusive purposes such as promotions, business contact information, and links to client markets.

↑ Octans

Offline or online accounting software with the cloud to make it easier for companies or SMEs

Market

Business/Revenue Model

Subscription-based

A trial model for 30 days for all categories of clients in the main product.

The average price for a 1-year subscription for 10 apps is \$3,200 and the monthly payment for maintenance is 10% of the price of 1-year apps.

65% reduction in license and maintenance prices for clients who want to subscribe for 5 years.

Clients get a free business website, and professional email during the subscription period.

What are we selling?

Selling landing page and microsite services for users who have micro businesses, ERP applications for established companies, SaaS for those (MSMEs) who want applications that are suitable for more specific areas, which they can learn quickly and without instructors, applications that always improvise and innovate, which requires no resources. additional human resources to maintain applications from live client sources, with very minimal risk of having a trusted partner to maintain live servers.

Point of sales, Business chat app, Hotel reservation management system software, Payroll management automated, Warehouse management system, Finance and accounting software, Human Resources Information System, E-Commerce management system, Issue center management system, microsite, Landing Page services.

Who are we selling to?

75% of the 64.2 million MSME data in Indonesia in 2021, has not touched the go-digital transfer, so for SaaS sales, we focus on targeting users who have new businesses with less than 100 employees, and have a turnover per year under 2 billion Rupiah. And for ERP, we focus on target companies that have more than 100 employees and have an annual turnover of more than 2 billion rupiahs.

How will we reach the market?

Focusing on our approach to the market by building socialization about our products through webinars and the like at MSME associations and several institutions that have worked with us, then we can get a user database that can be prospected, then the way we reach the market is, by how to increase sales prospect metrics through SEO, content marketing, and online promotion.

Where will we products?

The product is definitely on our official website, and prospective clients can directly ask for a demo from the website, also don't turn a blind eye to selling applications through other social media/email marketing channels.

How we will reach the market?

Boxity has also carefully developed a diverse marketing plan intended to keep our brand in the hearts and minds of our existing and prospective customers, enabling us to continue expanding our reach and growing our business.

Competitive Analysis – from features

FEATURE	Boxity	Mekari	Phincon	AscendERP	Forca ERP
Customer Relationship Management (CRM)	✓	✓	✓	✓	✓
Human Resources Information System (HRIS)	✓	✓	✓	✓	✓
Warehouse management system (WMS)	✓		✓	✓	
Inventory Item Management	✓			✓	
Payroll Automated System	✓	✓		✓	
Hotel management system	✓			✓	
Finance & Accounting System	✓	✓		✓	
Easy Installation	✓	✓	✓		
iOS & Android Implementation	✓				
Cloud Based (Hybrid)	✓	✓			
User Integrated	✓	✓		✓	
Chat in-site system	✓	✓			

The beside chart demonstrates that our system strikes the balance between needs, features, and pricing scheme. Established players such as SAP may have higher time efficiency, however, it equates to much higher prices which young and growing companies may not be able to afford. **Companies such as Forca ERP, Ascend ERP, Phincon, and Mekari** may have the same price range as us, but they offer fewer modules. Moreover, we can provide a more efficient system installation, personalized environment, user-friendly design, mobile applications, and faster application implementation compared to the others. We've also tied a distinct set of competitive advantages into Boxity ERP, which will help us differentiate from these competitors and ascend to a market leadership position.

With the competitors being firmly entrenched in the competitive landscape, gaining market share amongst them will be no easy task. Nonetheless, the market is sizable and has great growth potential, therefore there is plenty of room for new entrants like us.

Team

WHAT WE'RE LOOKING FOR

We're looking for \$100.000 for a 10% share

Also, we're looking for 18 months of runway to work on product-market fit, customer development, early marketing efforts, and profitability, and the investment will be in funds to fuel the support of company growth -- including manufacturing, ongoing development of our platform, and marketing efforts in order to continue expanding the Boxity brand. Any remaining funds will be allocated as operating capital.

Let's learn How to make It happen
